Title: Comparing Different Epinephrine Concentrations for Spinal Anesthesia in Cesarean Section: A Double-Blind Randomized Clinical Trial

Learning objectives:

By studying this paper the readers will be able to:
1. Explain the surgical procedures that can be done under spinal anesthesia
2. Number of drugs used in spinal anesthesia
3. Explain the effect of Epinephrine as an adjuvant in spinal anesthesia
4. Explain the effect of Fentanyl as an adjuvant in spinal anesthesia
5. Understand the indication of cesarean section
6. Know about the different concentration of Epinephrine in spinal anesthesia and their effects

Target groups:
Medical students, Residents and students of Anesthesiology, Anesthesiologists
