Title: Sublingual versus Vaginal Misoprostol for the Induction of Labor at Term: A Randomized, Triple-Blind, Placebo-Controlled Clinical Trial

Learning objectives:
By studying this paper, the reader will learn about:
1. History, storage, metabolization site, and half-life of misoprostol
2. Complications and contraindications of misoprostol in pregnancy
3. Recommendations of the FDA, ACOG, FIGO, and NICE about the drug for the induction of labor with a live-term fetus
4. Definition of “uterine hyperstimulation”
5. Definition of “uterine hypertonus”
6. Comparison between sublingual and vaginal administration of misoprostol for the termination of a live-term fetus

Target groups:
Perinatologists, Obstetrics and Gynecologists, Midwives, Medical Students
